

# WE ARE AUTISTIC

We can see things you don't

We can hear things you can't

Being autistic can be rewarding

We can be happy and have friends

We can be knowledgeable and intelligent

We can have an unique view to the world around us

Even if some of us don't have a voice we can still hear you

We do have feelings but we aren't always good at showing them

All we want is your understanding, acceptance and love

CANadada

For any medical advice, it is important to contact your GP. Our information is provided by people that have a personal perspective and approach.
